JULY 13, 2012

Bicycles are being stolen from yards, driveways, and parking garages.

The Burbank Police Department is currently investigating the theft of numerous bicycles being stolen from yards, driveways, apartment complexes, businesses, schools, and underground parking garages. These thefts are occurring during all hours of the day and are taking place citywide.

There have been some thefts that have occurred in which a bicycle was left unlocked and unattended, near a residence or in a parking structure. There have also been numerous reports that, during the theft of a locked bicycle, the lock has been cut.

We are encouraging individuals to write down the serial number of their bicycle and to also take a photograph of the bicycle to assist investigators in the recovery of stolen bicycles. We also recommend individuals to lock up their bicycles and secure them properly inside their garage or residence.

In the event you see any suspicious activity, please obtain as much information as possible and contact the Burbank Police Department directly at 1-818-238-3000.
